WORK & LEADERSHIP EXPERIENCE

Testrite (TLW)

Taipei, Taiwan

Front-End Software Engineer → Senior Engineer

2022 – 2026

- Promoted to Senior Engineer within a year for driving a high-impact redesign, and began leading junior engineers in maintaining the system
- Led a large-scale frontend architecture overhaul, migrating a single repo to a Monorepo, upgrading React 17 to React 18, replacing Bootstrap with Tailwind CSS, and adopting TypeScript across the board
- Led the redesign and decoupling of the Testrite and HOLA websites, auditing existing APIs and frontend logic while rebuilding pages and shipping new features
- Built an e-commerce page-building CMS from 0 to 1, with an extensible frontend architecture that lets business teams adjust ad placements on demand
- Independently built an interactive Christmas tree campaign page with complex product selection logic and state management, integrated with cart and checkout
- Defined coding style and folder structure standards, maintained frontend dependency strategy, and managed CI/CD pipelines
- Helped introduce AI tools into the development workflow and conducted code reviews to onboard new teammates

104 Job Bank

Taipei, Taiwan

Product Owner

2021 – 2022

- Led the guest-to-member conversion project, coordinating 6 engineering teams and aligning product and engineering requirements, targeting a 50% conversion rate
- Redesigned the company-wide category management backend, improving the UX of a decade-old system and boosting cross-team collaboration
- Led the self-referral letter revamp project across departments, driving a 3x increase in page views after launch
- Designed NLP text segmentation rules and built a job-related semantic dictionary to support machine learning training
- Tracked user behavior and outcomes via GA/GTM to inform product iteration

ft (Funtour)

Taipei, Taiwan

Backend Software Engineer

Feb. 2021 – Sep. 2021

- Built core flows for a ticketing platform, covering online purchases, flash sales, and transaction notifications
- Optimized the post-purchase email system and backend interface, and wrote development and integration docs
- Led a third-party API integration project, using Postman for testing and writing automated test scripts
- Supported payment system API testing and code review to ensure integration stability and data accuracy
